Section 1:
Introduction
FOREWORD

The Elevating Devices Mechanic (Class C) Program Outline is intended as a guide for instructors, apprentices, and employers of apprentices as well as for the use of industry organizations, regulatory bodies and provincial and federal governments. It reflects updated standards based on the British Columbia industry and subject matter experts.

Practical instruction by demonstration and student participation should be integrated with classroom sessions. Safe working practices, even though not always specified in each operation or topic, are an implied part of the program and should be stressed throughout the apprenticeship.

This Program Outline includes a list of recommended reference textbooks that are available to support the learning objectives and the minimum shop requirements needed to support instruction.

The Program Outline was prepared with the advice and assistance of the Elevating Devices Mechanic (Class C) Review Committee and will form the basis for further updating of the British Columbia Elevating Devices Mechanic (Class C) Program and learning resources by the BC Safety Authority.

Each competency is to be evaluated through the use of written examination in which the individual must achieve a minimum of 70% in order to receive a passing grade. The types of questions used on these exams must reflect the cognitive level indicated by the learning objectives and the Learning Tasks listed in the related competencies.

Workplace Achievement Criteria are included for those competencies that require a practical component.

The Elevating Devices Mechanic Personal Skills Passport will be used to verify the successful completion of all required tasks. Some competencies have more than one Achievement Criteria. Many of the Achievement Criteria require the passport holder to demonstrate the same competency on multiple setups over a period of time. A Certified Mechanic is required to initial each of the Learning Tasks and sign the bottom of the form for each Achievement Criteria.
ACKNOWLEDGMENTS

The Program Outline was prepared with the advice and direction of an industry steering committee convened initially by the BC Safety Authority (BCSA). Members include:

Irvine Jay          BC Safety Authority
Zoya Jones          SEP Products Group Ltd.
Daniel Royston      BC Safety Authority
Tony Violette       Tall Crane Equipment Ltd.

The BC Safety Authority would like to acknowledge the dedication and hard work of all the industry representatives appointed to identify the training requirements of the Elevating Devices Mechanic (Class C) occupation.
## HOW TO USE THIS DOCUMENT

This Program Outline has been developed for the use of individuals from several different audiences.

This table describes how each audience can use the document.

**PROGRAM ASSESSMENT**

Apprentices will be assessed fairly and accurately throughout the program on the various skills required to be a professional Elevating Devices Mechanic (Class C). Assessment activities are designed to provide feedback and allow for further development of skills that have been identified as essential for on the job performance. The forms of assessment used in this program are described below.

<table>
<thead>
<tr>
<th>Completion Requirement</th>

</tbody>
</table>
**OCCUPATIONAL ANALYSIS CHART**

**Occupation Description:**

“Elevating Devices Mechanic (Class C)” means a person who designs, constructs, installs, alters, repairs, maintains, or tests personnel hoists as defined in the latest edition of the *British Columbia Elevating Devices Safety Act and Regulation.*

• Conditions  
• Safety meeting requirements  
• Reporting hazards and incidents  
• Reporting injuries  
• Accident/incident investigations  
• Employee orientation  
• First aid  
• Records and statistics  
• Non-compliance procedures |
Line (GAC):  A  Use Safe Work Practices  
Competency:  A3  Use WHMIS

Objectives
To be competent in this area, the individual must be able to:

- Describe the purpose of the Workplace Hazardous Materials Information System (WHMIS) Regulations.
- Explain the Contents of Material Safety Data Sheets (MSDS).
- Explain the Content of a WHMIS label.
- Apply WHMIS regulations in the workplace.

<table>
<thead>
<tr>
<th>Learning Tasks</th>
<th>Content</th>
</tr>
</thead>
</table>
| **1** Explain the primary goals of WHMIS | • Reducing injuries and disease  
• Communicating information  
• Reducing exposure to hazardous materials |
| **2** Describe the rights and responsibilities of employers, suppliers, and workers under WHMIS legislation | • Recognition of rights  
  - Workers  
  - Employers  
  - Suppliers  
• Legislation  
• Availability and location of information  
• Updating  
• Code requirements |
| **3** Describe the six hazard classes of WHMIS | • Hazard classes |
| **4** Describe the three main elements of WHMIS | • Labels  
• Material safety data sheets (MSDS)  
• Education and training programs |
| **5** Explain the requirements for WHMIS labels | • Supplier labels  
• Workplace labels |
| **6** Describe the primary information found on a Material Safety Data Sheet | • Product information  
• Hazardous ingredients  
• Physical data  
• Fire or explosion data  
• Reactive data  
• Toxicological properties  
• Preventative measures  
• First aid measures  
• Preparation information |
### Objectives

To be competent in this area, the individual must be able to:

- Select appropriate personal protective equipment.
- Inspect and maintain personal protective equipment.
- Use personal protective equipment.

</table>
| **1** Describe the installation of conductors | • Types  
• Materials  
• Gauge  
• Insulation (thermal rating)  
• Ampacity  
• Termination  
• Marking |
| **2** Describe the installation of raceways | • Types  
• Sizes  
• Support  
• Bending  
• Planning runs  
• Raceway fill  
• Installation of conductors |
| **3** Describe the installation of traveling cables | • Construction  
• Handling  
• Preparation  
• Installation  
• Replacement  
• Protection |
| **4** Describe elevator related circuits | • Electrical protective devices  
• Operation systems  
  - Door operation  
  - Direction selection  
  - Acceleration  
  - Deceleration  
  - Final stop  
  - Safety circuit components  
  - Interlocks  
  - Normal terminal slow downs  
  - Emergency terminal slow downs  
  - Redundancy  
  - Fire service and emergency power |
| **5** Install raceways, conductors and components | • Raceway runs  
• Placement of boxes, fittings and supports  
• Number of conductors in runs  
• Conductor insulation rating and size  
• Raceway size  
• Box and fitting sizes  
• Devices and switches  
• Code requirements |

Workplace Achievement Criteria

1. The individual will interpret drawings and specifications to install a wiring raceway.
2. The individual will interpret drawings and specifications to install a fixture.
3. The individual will extract information from a wiring diagram to install wiring.

Passport sign-off by a Certified Mechanic for each workplace achievement criteria is required.
Line (GAC): G  Apply the Principles of Electricity and Electronics
Competency: G6  Maintain Electrical and Electronic Systems (Level 2)

Objectives

To be competent in this area, the individual must be able to:

• Perform maintenance checks.
• Describe the maintenance of motors and generators.
• Maintain motors and generators.

Objectives
To be competent in this area, the individual must be able to:

- Safely dismantle a hoist without a counterweight.
- Safely dismantle a personnel hoist with a counterweight.

<table>
<thead>
<tr>
<th>Learning Tasks</th>
<th>Content</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 De-rig the counterweight and</td>
<td>• Safety procedures</td>
</tr>
<tr>
<td>counterweight cables</td>
<td>• Lowering the counterweight to ground</td>
</tr>
<tr>
<td></td>
<td>• Coiling the cables on the roof of the car</td>
</tr>
<tr>
<td></td>
<td>• Removing the cat head</td>
</tr>
<tr>
<td></td>
<td>• Removing the counterweight</td>
</tr>
<tr>
<td>2 Dismantle the mast and braces</td>
<td>• Safety procedures</td>
</tr>
<tr>
<td></td>
<td>• Using a mobile or tower crane</td>
</tr>
<tr>
<td>3 Dismantle the cable trolley</td>
<td>• Safety procedures</td>
</tr>
<tr>
<td></td>
<td>• Removing the support arm and supply cable</td>
</tr>
<tr>
<td></td>
<td>• Removing the cable trolley</td>
</tr>
<tr>
<td>4 Remove the drive and car</td>
<td>• Safety procedures</td>
</tr>
<tr>
<td></td>
<td>• Supporting the car and drive</td>
</tr>
<tr>
<td></td>
<td>• Permanently disconnecting main power</td>
</tr>
<tr>
<td></td>
<td>• Disconnecting the wiring</td>
</tr>
</tbody>
</table>

Workplace Achievement Criteria
1. The individual will develop a site specific plan and dismantle a personnel hoist without a counterweight a minimum of three times.

2. The individual will develop a site specific plan and dismantle a personnel hoist with a cable following safety procedures a minimum of three times.

Passport sign-off by a Certified Mechanic for each workplace achievement criteria is required.
Section 4:
Training Provider Standards
FACILITY REQUIREMENTS

Classroom Area
- Minimum 22 square feet per student
- Comfortable seating and tables suitable for learning
- Compliance with the local and national fire code and occupational safety requirements
- Meets applicable municipal zoning bylaws for technical instruction and education facilities
- Overhead and multimedia projectors with a projection screen
- Whiteboard with marking pens and erasers
- Lighting controls to allow easy visibility of the projection screen while allowing students to take notes
- Windows must have shades or blinds to adjust sunlight
- Heating/air conditioning for comfort all year round
- Acoustics in the room must allow audibility of the instructor

Shop Area
- Minimum 3,000 square feet of shop area including a tool crib and work stations
- Minimum 10 foot ceiling height in shop areas
- Minimum 8 foot ceiling in lab areas
- Adequate heating, lighting and ventilation
- Refuse and recycling bins for used shop materials
- First-aid equipment
- Shops will support practical requirements as outlined in the program outline

LAB REQUIREMENTS

Student Facilities
- Adequate eating area as per WorkSafeBC requirements (4.84 OHS Regulation and Guidelines)
- Adequate washroom facilities as per WorkSafeBC requirements (4.85 OHS Regulation and Guidelines)
- Personal storage lockers

Instructor’s Office Space
- Adequate office space for student consultation
- Desk and filing space
- Computer
- Internet access
- Printer
- Adequate storage facilities for material and training aids
- Access to photocopier
- Telephone
## TOOLS AND EQUIPMENT

### HAND TOOLS

LINE A: USE SAFE WORK PRACTICES

A1: Control Workplace Hazards
- WCA Part 3, Division 3, Section 115 – 117
  – General Duties of Employers, Workers and Others
- OHS Regulation Part 5, Section 5.2
  – General Information Requirement
- OHS Regulation Part 6, Section 6.6
  – Assessment and Classification
- OHS Regulation Part 6, Section 6.8
  – Procedures
- FE Safety Handbook, Section 4.2 – 4.4
  – Fall Arrest
- FE Safety Handbook, Section 7
  – Lockout and Tagout

A2: Comply with the OHS Regulation and WorkSafeBC Standards
- WCA Part 3, Division 3, Section 115 – 117
  – General Duties of Employers, Workers and Others
- WCA Part 1, Division 5, Section 53
  – Worker Notification of Injury

A3: Use WHMIS
- Hazardous Products Act (Canada)
- WSBC Guideline G5.3-1
  – WHMIS Application

A4: Use Personal Protective Equipment
- OHS Regulation Part 8
  – Personal Protective Equipment and Clothing
- FE Safety Handbook, Section 3
  – Personal Protective Equipment

A5: Apply Fire Prevention Practices
- OHS Regulation Part 4, Section 4.32
  – Access to Work Area
- WSBC Guideline G5.97
  – Emergency Plan
- WSBC Guideline G5.99
  – Risk Assessment
LINE B: USE TOOLS AND EQUIPMENT

B1: Use Hand Tools
- FE Safety Handbook, Section 9.1
  - Hand Tools

B2: Use Power Tools
- FE Safety Handbook, Section 9.2
  - Portable Electrical Tools and Lights

B3: Use Measuring and Alignment Tools
- None

B5: Use Ladders, Scaffolding, and Platforms
- FE Safety Handbook, Section 10
  - Portable Ladders/Scaffolds/ Stationary Work Platforms
- OHS Regulation Part 13, Division 2 – 4
  - Ladders, Scaffolds and Temporary Work Platforms

B6: Use Rigging and Hoisting Equipment
- FE Safety Handbook, Section 12
  - Material Handling
- OHS Regulation Part 15
  - Rigging

B7: Use Electrical Test Equipment
- FE Safety Handbook, Section 5
  - Electrical Safety

LINE C: USE FUNDAMENTAL SKILLS

C1: Describe the Elevating Device Industry
- None

C2: Use Mathematics and Science (Level 2)
- None

C3: Apply Mechanical Principles
- None

C4: Read Drawings and Specifications
- None

C5: Use Acts, Regulations, and Codes
- Safety Standards Act General Regulations
- Elevating Devices Safety Regulation
- Applicable codes

C6: Use Manufacturer and Supplier Documentation
- None

C7: Plan a Project
- None

C8: Apply Troubleshooting Techniques
- None
LINE D: INSTALL TRACTION AND HYDRAULIC COMMON COMPONENTS

D5: Install Wiring Raceways, Fixtures, and Wiring
- B44 Section 2.8.2.1 (CSA – C22.1)
  - Electrical Equipment and Wiring

LINE E: INSTALL TRACTION ELEVATORS

E1: Describe the Principles of Traction Systems
- None

LINE F: INSTALL HYDRAULIC ELEVATORS

F1: Describe the Principles of Hydraulic Systems
- None

LINE G: APPLY THE PRINCIPLES OF ELECTRICITY AND ELECTRONICS

G1: Describe the Principles of Electricity
- B44 Section 8.6.1.3
  - Electrical Safety
- FE Safety Handbook, Section 5
  - Electrical Safety

G2: Read Electrical Drawings and Specifications
- None

G4: Describe Electrical and Electronic Controls (Level 2)
- None

G5: Install Electrical Systems
- CEC Section 38
  - Elevating Devices

G6: Maintain Electrical and Electronic Systems (Level 2)
- B44 Section 8.6.12.2.5
  - Log Book

G7: Troubleshoot Electrical and Electronic Systems (Level 2)
- None
LINE K: REPAIR ELEVATING SYSTEMS

K2: Service Braking Systems
- None

K6: Replace Machines and Motors
- None

LINE N: INSTALL RACK AND PINION PERSONNEL HOISTS

N1: Layout the Base and Buffer Assembly
- Z185 Section 5
  - Mast, Foundation
- Z185 Section 6
  - Hoistway Enclosure

N2: Install Masts, Braces, Anchors, and Limit Cams
- Z185 Section 4
  - General Requirements

N3: Install Car Enclosure, Drive Assembly and Counterweight Assembly
- Z185 Section 8
  - Cars
- Z185 Section 11
  - Counterweights

N4: Install Hoistway Door Wiring and Inspect Hoistway Door Assembly and Hoarding
- Z185 Section 7
  - Hoistway Landings and doors

N5: Install Base and Car Control Panel and Wiring
- Z185 Section 4.3
  - Electrical Wiring and Devices

N6: Adjust and Commission Personnel Hoists
- Z185 Section 24
  - Acceptance, Inspections and Tests

N7: Dismantle a Personnel Hoist
- TBA

INSTRUCTOR REQUIREMENTS

Occupation Qualification
The instructor must possess one of the following:
- A BC Certificate of Qualification, or
- A Certificate of Qualification from another Canadian jurisdiction

Work Experience
The instructor must possess:
- A minimum of 5 years’ experience working in the industry as a journeyperson

Instructional Experience and Education
It is preferred that the instructor also possesses one of the following:
- An Instructor Program Diploma, or equivalent
- A Bachelor’s Degree in Education
- A Master’s Degree in Education

The BC Safety Authority is an independent, self-funded organization mandated to oversee the safe installation and operation of technical systems and equipment. In addition to issuing permits, licences and certificates we work with industry to reduce safety risks through assessment, education and outreach, enforcement, and research.
